

## LITERACY, COMMUNICATION AND LANGUAGE

Our focus this half term will be around the novel “Cosmic” by Frank Cottrell-Boyce. The children will be using this book to extend their understanding of vocabulary and explore characters in role. They will be given opportunities to develop their writing skills through newspaper articles and story writing.

### UNDERSTANDING THE WORLD

As our part of our Cosmic topic we will begin by focusing on space and topical events that have happened, both recently and in the past. The children will also begin a series of Science lessons focusing on light and sound.

## MATHEMATICS AND COMPUTING

This half term the children will begin with a big focus on division as well as revising their knowledge of the other calculation methods. We will then be exploring the relationship between fractions, decimals and percentages. They will be developing their understanding through problem solving and reasoning. As always the children will be focusing on their Maths targets throughout the half term as well.

### EXPRESSIVE ARTS AND DESIGN

Through art and design, the children will explore different planets and how to present facts in interesting ways. They will also design and create a healthy meal for an alien towards the end of the half term.

## PSHE AND RELIGIOUS EDUCATION

Through the use of R Time and circle sessions, children will discuss their achievement so far and set personal goals for the future. They will be exploring and debating challenging open ended questions during Philosophy.

**Our New Creative Learning Journey in Year 5.....**

# Cosmic!

## PHYSICAL EDUCATION

The children will be focusing on improving their body control and movement through gymnastics this half term. In small groups and with partners, they will be creating routines. They will also be developing fundamental skills through the use of skills based PE approach.
